

EX-LCR-CGII LAND CLEARING RAKE II

* Attachments depicted may include optional paint, upgrades, or custom configurations.

The Craig Land Clearing Rake Series II combines a rake and a thumb into an all-in-one attachment that excels at tough forestry applications that require picking, sorting, and shaking free non-fibrous debris during land clearing and grubbing applications. A helac rotator is used to operate the thumb and provides a strong and constant grip on material in the rake through the rake's rotation. The helac rotator has no exposed shafts and is sealed for a long service life.

- Easily transfers between machines within the same class and hookup with no welding required.
- This attachment requires one free hydraulic circuit that has two way flow.
- Jumper hoses are not supplied.
- Your choice of lugging.
- Your choice of G.E.T. brand
