LOADMAX

THE BUCKET THAT ADDS UP TO 30% MORE PRODUCTIVITY TO YOUR EARTHMOVING JOB

Introducing **LOADMAX**—a bulk earth moving bucket that moves more in less time. Built for excavators 35 tons and greater, LoadMax combines the toughest steel technology available with payload optimization and proven Craig design principles to deliver maximum efficiency.

Our formula? It's simple. Better quality steel means less steel in the bucket – less steel in the bucket means more payload... and more payload in the bucket means *more money in the owner's pocket*.

We optimize each **LOADMAX** bucket to the job's requirements. From the jobsite operator's perspective, it looks and feels just like a conventional bucket -except it moves more material in fewer passes.

MINIMAL WEIGHT. MAXIMUM PAYLOAD.

 A 514/QT 100  AR 400  AR 450

WHAT'S BENEATH THE PAINT?

Don't let the familiar shape fool you. While **LOADMAX** may look like a standard bucket, beneath that classic silhouette is advanced, treated abrasion-resistant AR 450 steel, precisely engineered to handle heavier loads without extra bulk. No flashy design needed- just real, proven performance that moves more for less.

MAKE EVERY PASS COUNT.

Every **LOADMAX** is pass-match optimized to your job, so you can make the most from every pass. Here's how we do it:

1. Determine the weight and type of material to be loaded
2. Assess the excavator's capabilities.
3. Optimize the bucket design and volume for efficient loading using the strongest, lightest steel on the market to reduce dead bucket weight and maximize payload.

TRUCK CAPACITY
÷ NUM. OF PASSES
= HEAPED BUCKET SIZE

LESS STEEL. MORE YIELD.

Cut what isn't earning its keep. **LOADMAX** buckets use high-strength steel exactly where you need it, stripping away excess weight to free up space for larger payloads. The payoff is straightforward: fewer empty pounds per pass translates into more volume moved, more money in your pocket, and less stress on your equipment.

ENGINEERED FOR YOUR JOB.

Every jobsite comes with its own demands, so we design **LOADMAX** buckets to rise to the occasion. From loose soil to abrasive industrial sands, we customize each bucket's geometry and wear protection for optimal results. With nearly eight decades of attachment design behind us, you can count on a purpose-driven solution that works as hard as you do, no matter where the job takes you.

RECOMMENDED USE CASES:

LOOSE SOIL	✓	SILT + LOAM	✓
SAND	✓	GRAVEL	✓
HARD PAN CLAY	✓	WELL BLASTED MATERIAL (<20")	✓
LIMESTONE	✓	SHALE	✓
IMPACT	MED.	ABRASION	HIGH

OUR COMMITMENT

CUSTOMERS

Craig is dedicated to providing the highest quality products and support to allow our customers to unlock the maximum potential productivity of their equipment

TEAM MEMBERS

We are committed to providing our Team Members with a stable, 5S and safe working environment that encourages personal and team development. Team creativity and innovation are the cornerstones on which our company has been built and only through these achievements will it succeed.
