# **CRAIG GRAB BUCKET SERIES 2**

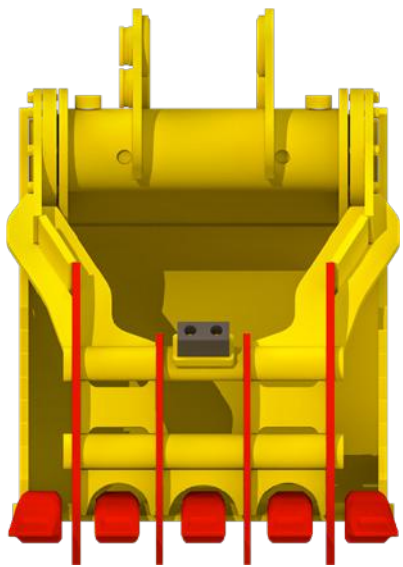

EXB-CGB2  
CRAIG GRAB BUCKET SERIES 2  
FEATURES AND BENEFITS

The Craig Grab Bucket 2 is part of the Craig Grab Bucket family. The most exciting feature is the helical actuator that replaces standard cylinders, making the attachment more reliable and stronger than ever. The series 2 has more clamping force for heavy and uneven loads.

HELICAL ACTUATOR

A Helac Rotary Acuator Is Installed Into The Bridge of The Grab Bucket to provide a constant grip on materials in this bucket. The Helac Acuator is capable of providing up psi 54,000 lbs of clamping pressure at 3,000 psi of hydraulic pressure. This pressure can be maintained throughout the full rotation of the attachment. This means no loss of clamping force, unlike a conventional bucket and thumb. Rotary Actuators Are fully enclosed with no exposed shafts to be damaged by loose material or the elements meaning more uptime for the attachment.

OEM and aftermarket G.E.T. available to work with your application.

SERRATED ATTACHMENT DESIGN

The Grab Bucket Is Designed with Serrations For Improved Clamping Force And Gripping Power making material retention easier.

INTERMESHING TEETH

The Grab Bucket Tines Contact The Base Edge Making Material Clamping More Effective

HOOK-UP / GET

Available with a variety of hook-ups including Wedge Lock, Pin-on, S Series, and Manual Bar Lock lugging. Vertical | wall lugging also available in most hook-up styles. Pin-on hook-ups are align bored to OEM tolerances. Available with a variety of GET brands.

WEAR PLATE

The Craig Grab Bucket S.2 feature a Hardox 400 plate to ensure the bucket has a long life.

INSTALL

Install is easy as there is no welding required. Users can switch between machinery quickly for maximum productivity of your fleet.
