

EXB-SAND SAND BUCKET

*Attachments depicted may include optional paint, upgrades, or custom configurations.

Craig's excavator sand bucket uses a smooth, contoured scoop design paired with a flat bottom for secure ground attachment, making it ideal for efficiently scooping materials like sand and fine gravel.

- Reduced surface area and lack of GET allows for easy penetration through for soils
- Flat design allows for detailed grading during pipe laying operations
- Open top prevents soils from "air locking" and suctioning to inside of bucket
- Bolt on edge (optional)
