CRAIG GRADER MOWER

*Attachments depicted may include optional upgrades or custom configurations.

CRAIG™

The Craig Grader Mower gives operators a simple, effective way to maintain tall roadside grass and vegetation directly from the grader. Designed to mount to the Craig 300 Series Postless Wing assembly, the mower cuts a 7′ swath using three 1/2″ AR400 flail blades mounted to a single weighted flywheel. The mower deck floats to follow the contours of the ditch, helping maintain a consistent cut across uneven ground. Manual adjustment provides up to 30″ of additional reach, while heavy 1/2″ chains at the intake and discharge help contain debris within the mower deck.

- Mounts to the Craig 300 Postless Wing Assembly and the Craig Flex System
- 7′ cutting path
- Single weighted flywheel
- Three 1/2″ AR400 flail blades
- Floating mower deck follows ditch contours
- Three height adjustable wheels for constant ground contact
- Up to 30″ of manual reach adjustment
- 1/2″ safety chains on intake and discharge
- Compatible with Craig land clearing attachment hydraulics
