

MG-GR GRAVEL RETRIEVER

* Attachments depicted may include optional paint, upgrades, or custom configurations.

The grader retriever is perfect for reclaiming lost gravel back to roadsides. The discs chew through grass and pull gravel back to the road side, reducing the need to add granulars to support the road surface.

- Maintains a safe driving surface on shoulder of the road
- Mulch roadside berm and allow water to drain away from the road surface
- Fill ruts along edge of pavement with existing granular material
- Reduces mowing operations
- Utilizes 12 Harrow Disc Blades that are 24" diameter
- Adjustable wheel supports weight of retriever on the intake end
- Simple to install. Remove the Craig 301/302 wing moldboard and install the retriever in its place
