

# MG-DRM DIRT ROAD MEDIC

\* Attachments depicted may include optional paint, upgrades, or custom configurations.

Craig's Dirt Road Medic is built to bring tired gravel roads back into shape fast. Over time, dirt roads develop potholes, washboarding, and hard-packed grooves from traffic and weather. The Dirt Road Medic cuts into that compacted surface to loosen material for easier regrading and a smoother finish. It can also push larger rocks aside and break through thick winter ice when conditions demand it.

- 9' 6" cleared path.
- Ideal for summer and winter use.
- Uses individually replaceable stinger bits.
- Works with Craig QKMG Parallel Quick Hitch lift group to allow for predictable behavior and provide down pressure. (option to fit competitors' parallel harnesses available)
- Eliminate wasted time replacing grader moldboard edges every time the need for stinger bits arises.
- Easily attach to the motor grader QKMG for use when needed and easily dropped when not needed.
- Carbide tipped grading bit that rotates freely when being dragged through the ground to decrease friction and wear.
- Rakes the ground, loosening compacted gravel making a uniform surface that is ready for the Craig Motor Grader packer line.
- V-shape helps roll unwanted larger rocks off the road surface and away from the following packer.
