

ST-CSEB EJECTOR BUCKET

* Attachments depicted may include optional upgrades or custom configurations.

The Craig Scooptram Ejector bucket is designed to allow for easy loading and unloading of material in underground mining applications where being able to work in confined spaces is crucial. The bucket ejects material by hydraulically pushing the floor of the bucket outwards, eliminating the need to raise the bucket up to dump it.

- High visibility, corrosion resistant paint and primer available
- Ejector style floor pushes out via two hydraulic cylinders
