

OUR MISSION

CUSTOMERS

Craig is dedicated to providing the highest quality products and support to allow our customers to unlock the maximum potential productivity of their equipment.

TEAM MEMBERS

We are committed to providing our Team Members with a stable, 5S and safe working environment that encourages personal and team development. Team creativity and innovation are the cornerstones on which our company has been built and only through these achievements will it succeed.

LOADER

AGRICULTURE ATTACHMENTS

WL-CLR LAND CLEARING RAKE

The **WL-CLR Land Clearing Rake** turns your loader into a powerful tool for slash handling, biomass fuel collection, & site prep. Its boxed frame delivers maximum strength and visibility, while long, curved teeth provide excellent load capacity. It's built with AR 400 wear plating in critical areas, offers optional replaceable teeth, & is available in Craig Quik Key, OEM coupler, & pin on configurations, also offered without hydraulic clamps.

WL-CEB CRAIG EJECTOR BUCKET

The **WL-CEB Ejector Bucket** is designed for easy material handling where dump height is restricted. Its hydraulically activated back swings forward to eject material, enabling controlled dumping, reducing carry-back, and helping prevent cross-contamination. It offers increased dump clearance, protects cylinders within the frame, and can function as a standard bucket when needed.

WL-LMFS FEEDLOT BUCKET

The **WL-LMFS Feedlot Bucket** is designed for efficient handling of large heaped loads and round or square bales. It features a **dual-cylinder top clamp** for excellent visibility and secure grip, with **customizable clamp** options for specific applications.

A bolt-on reversible cutting edge ensures long life, while **AR 400** wear plate protects critical areas.

This bucket is available in **Craig Quik Key, OEM coupler, and Pin-on** configurations, drilled for dealer-specified ground engaging tools, and requires an **optional third valve** for operation.

LIGHT MATERIAL BUCKETS (BH-LM, WL-LM)

WL-LM

Maximize each load and save time with **Craig Light Material Buckets**, engineered for handling wood chips, sawdust, peat moss, hog fuel, snow, and other light materials to your machine's full capacity.

BH-LM

Designed for efficient loading, these buckets feature optional visibility slots, a bolt-on reversible cutting edge for long life, and AR 400 wear plate in critical areas. Available in Craig Quik Key, OEM coupler, and Pin-on configurations, they are drilled to accept dealer-specified edges and can be customized to meet your specific requirements.

WL-GPP PERFORMANCE BUCKET

The **WL-GPP Performance Bucket** combines over 70 years of proven design for efficient loading and dumping.

Built with AR400 wear plate in critical areas, it meets SAE capacity standards and is drilled for dealer-specified ground engaging tools. Available in Craig Quik Key, OEM coupler, and Pin-on configurations.

CRAIG PALLET FORKS (WL-HA, WL-CPF, WL-HAFT)

Craig Pallet Forks are built for versatility and durability in agricultural applications. The lineup includes **WL-HA Hydraulic Angling Pallet Forks** for working in tight spaces, **WL-CPF Pallet Forks** in multiple sizes for standard lifting tasks, and **WL-HAFT Hydraulic Adjustable Pallet Forks** for changing tine spacing on-the-fly from the cab.

Sizes range from compact designs for 1.3 yd loaders to heavy-duty models for 8 yd machines, with specialized versions for shipping containers. All forks feature adjustable spacing, multiple tine capacities, and are available in **Craig Quik Key, OEM coupler, and Pin-on** configurations, with optional third valve requirements on select models.

AGRICULTURE ATTACHMENTS

WL-QKSB CRAIG CRANE BOOM

The **WL-GP-M Mulch Bucket** comes in a standard 56" width (up to 72") and delivers a true 1 cu. yd. struck or 1.19 cu. yd. heaped capacity for accurate loading of quarter ton and half ton pickups. Its deep, narrow profile ensures precise measurement, while a bolt on reversible cutting edge and AR 400 wear plating provide long-lasting durability. Available in Craig Quik Key, OEM coupler, and pin on configurations, and drilled for dealer specified edges.

The **WL-QKSB Loader Crane Boom** provides a safer, more efficient alternative to bucket lift hooks, offering greater reach, accuracy, and visibility for material handling. Available in 2 section or 3 section configurations, including an optional hydraulic extension, it significantly extends the capabilities of any wheel loader. Compatible with Craig Quik Key, OEM couplers, and pin-on setups.

WL-GP-M CRAIG MULCH BUCKET

WL-HT HIGH TIP BUCKET

The **WL-HT High Tip Bucket** boosts dump height for loading high-side trucks without ramps. It features a dual-cylinder design with cushion valve, visibility slots, and a flat bottom for smooth, accurate loading.

Built with AR400 wear plate and sealed hinge bushings for durability, it's available in Craig Quik Key, OEM coupler, and Pin-on configurations, drilled for dealer-specified edges, with an optional third valve.

WL-SR SKELETON ROCK BUCKET

The **WL-SR Craig Skeleton Rock Bucket** is designed for separating rocks and other large materials from loose soil.

The SR bucket for loaders is made of durable steel to withstand tough applications. Slots on all sides sift loose material to separate rocks while upper slots increase visibility.

The **WL-BS Bale Spear** is built for safe and efficient bale handling. This heavy duty 4 tine loader bale spear makes it easy to lift, move, and stack bales with confidence.

The **four tine design** improves stability and load control during transport, helping reduce bale roll and keeping your lift steady across uneven ground. Ideal for hay, straw, and silage bales. A simple, reliable attachment for **everyday agriculture work**.

WL-BS BALE SPEAR

EXCAVATOR AGRICULTURE ATTACHMENTS

EX-RT RIPPER TOOTH

The **EX-RT Ripper Tooth** is built for extreme duty where standard rippers fail. Its double-reinforced shank and gusseted, boxed lugging plate deliver maximum penetration and strength.

Available in Wedge Lock, Pin-on, S Series, or Manual Bar Lock lugging, with various ground engaging tools and pin-on hook-ups bored to OEM tolerances.

EX-LD LIFTING DEVICE

The **EX-LD Lifting Device** is a rugged, reliable solution for direct heavy lifting on the jobsite. Built with a simple yet strong design, it delivers durability and versatility for demanding applications.

This attachment greatly improves operator visibility compared to using a lift-eye on a bucket, enhancing safety and precision during lifting tasks. It can be manufactured for direct hookup, customized to fit your machine, or equipped with manual wedge lock hooks to suit your specific requirements.

EX-CBR BRUSH RAKE

The **EX-CBR Brush Rake** is a medium-duty attachment designed for efficient moving and sorting of brush and loose material. Its optimized profile ensures effective handling, while multiple tooth configurations (4-7) are available in widths up to 101" based on machine size. Offered in Wedge Lock, Pin-on, S Series, or Manual Bar Lock lugging, with various ground engaging tools and pin-on hook-ups bored to OEM tolerances.

EX-CWT CRAIG WORKING THUMB

The **EX-CWT Craig Working Thumb** is engineered with increased reach and enhanced curvature to grip larger material with better control and alignment to the bucket's rotation. It offers extended curl for improved grasp capacity and an optimal roll out angle for greater reach. Installation and hydraulic kits are available.

EX-CTS CRAIG TREE STUMPER

The **EX-CTS Craig Tree Stumper** is designed for efficient stump removal with dual shanks that minimize soil disturbance, improving land clearing productivity by reducing the need for extra filling and grading. It includes heel hooks on both shanks & a serrated center plate for cutting lateral roots, and is compatible with Craig mechanical or hydraulic thumbs. Available with Pin on, Wedge Lock, or S style lugs, & offered with serrated tines for improved material retention or smooth chamfered tines for improved penetration. It is equipped with AR400 shanks or can be fitted with an optional replaceable GET, depending on customer needs.

EXB-HD HEAVY DUTY TRENCHING BUCKET

The **EXB-HD Heavy Duty Trenching Bucket** is built to match your excavator and application needs, using quenched and tempered AR400 steel throughout all wear areas for maximum durability. It comes pre drilled for side cutters or wear shrouds and is available with optional hard facing and a range of ground engaging tools. Choose from Wedge Lock, Pin on, S Series, or Manual Bar Lock lugging, with pin on hook ups bored to OEM tolerances and an enclosed lift ring included as standard.

EXB-BB BLUEBERRY BUCKET

The **EXB-BB Blueberry Bucket** is built specifically for established blueberry fields that require ground leveling to support mechanized harvesting. Its shallow cutting edge allows operators to pierce the soil and smooth the surface beneath mature plants with minimal impact on roots and surrounding vegetation.

It is available in Wedge Lock, Pin on, S Series, or Manual Bar Lock lugging, with multiple width and tooth configurations, as well as a range of ground engaging tool options to suit your needs.

EXB-HACL HYDRAULIC ANGLING CLEAN-UP BUCKET

The **EX-HACL Hydraulic Angling Clean Up Bucket** provides up to 45° of left to right rotation, featuring a flat bottom design and angled cylinders to reduce material buildup. Built from high tensile, abrasion resistant steel, it's available with straight or serrated edges and comes pre drilled for bolt on options. Compatible with Wedge Lock, Pin on, S Series, and Manual Bar Lock lugging, it includes a flow control valve for fine tuned swing speed and requires no kickstand, standing on its own for ease of storage & and pickup.

CRAIG TRENCHING BUCKETS

Craig Excavator Trenching Buckets are built for a wide range of digging applications, from utility work to agriculture, providing reliable performance & durability on any job site.

YOUR BUCKET. YOUR WAY.

- Wide variety of aftermarket/OEM Teeth & Adapters
- Customizable width & capacity
- Standard or Quik Fill Bucket Profile
- Bolt-on or Weld-on Sidecutters
- Sidebar Protectors
- Optional Burp Holes
- Heel Shrouds
- 'Chocky' Bars
- Weld-on Lipsavers
